

I strongly support net neutrality backed by Title 2 oversight of ISPs

The weakening of net neutrality will not only hurt ISP clients, but in the long run, it will hurt the FCC and the ISPs. As has probably been exclaimed by previous filers, this will cause uproar as people will feel their 1st Amendment rights weaken, thus weakening the image of a free America in general. Boycotts, strikes, and protests will obviously take place, causing rage and riots. All this because a few groups of people want to make a little more money. This is not a threat, this is a warning. I fully support net neutrality. I hope it's here to stay, for the good of the general welfare of the American population and our future.
